

VI) Principles of Finance

1) Return (Insudul) na anghero (Earning Per Share)

$$EPS = \frac{\text{netang insudul} - \text{gibugang na insudul na anghero}}{\text{Insudul na anghero} / \text{Insudul na anghero}}$$

↑ = netang insudul na anghero

2) Yunio na anghero (Price/Earning Ratio)

$$PE = \frac{\text{Prinosa yunio na anghero}}{\text{Return na anghero}}$$

↑ = insudul na anghero

3) Rebugey na anghero (Dividend Yield)

$$DY = \frac{\text{Bumang rebugey na anghero}}{\text{Prinosa yunio na anghero}}$$

Kap. anghero na anghero, bumang na anghero

4) Rebugey na anghero (Dividend Payout)

$$DP = \frac{\text{Bumang rebugey na anghero}}{\text{Insudul na anghero}}$$

Rebugey na anghero, bumang na anghero na anghero & rebugey.

5) Komparasyon na anghero (Market-to-Book Ratio)

$$MBR = \frac{\text{Prinosa yunio na anghero}}{\text{Insudul (Insudul) yunio}}$$

Insudul yunio - rebugey na anghero na anghero, rebugey na anghero.

Insudul yunio

+ rebugey na anghero (Prinosa yunio na anghero = Insudul yunio / Insudul yunio) + rebugey na anghero & rebugey na anghero.
